

ADHD in Prison

Screening & Assessment Protocol

R. Mocking, prof. dr. M. Kempes, dr. J. Meijers, J. Julsing

Clinical trajectory

Step 1 Screening

- **2 ADHD-questionnaires**
(Adult ADHD Self-Report Scale + Ultrakorte Vragenlijst voor ADHD bij volwassenen)
- ADHD indicaton based on the two screening questionnaires? → additional ADHD self-report questionnaire

Step 2 Diagnostic testing

- Positive screening outcome?
 - **Extensive intake** (focus: ADHD-symptoms)
 - **DIVA-5** (*Diagnostic Interview for ADHD in adults*)
 - **QbTest** (objective ADHD-symptom measuring instrument, computer-based test)

Step 3 Evaluation

- **Multidisciplinary team meeting** (psychologist, psychiatrist, psychiatric nurse practitioner)
Evaluation/discuss: gathered information and observations

Step 4 Diagnosis

- **Psychiatrist**
 - Psychiatric consult
 - Diagnosis AD(H)D (yes/no)
 - Medication if indicated

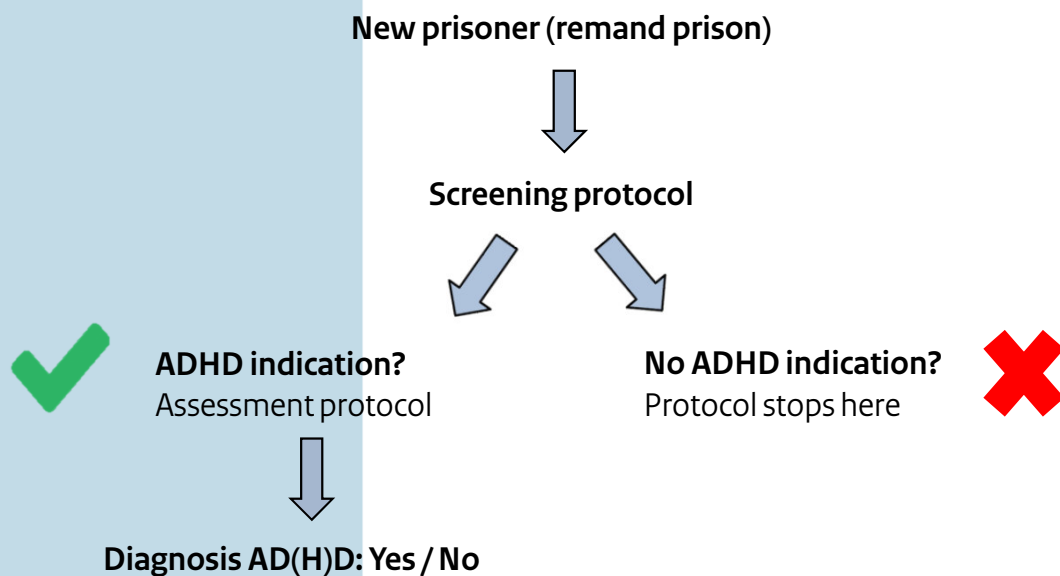

Overview: Clinical & research trajectory

Clinical trajectory

Standardized screening & assessment protocol

Research trajectory

Collecting additional information + research: determine the effectiveness of the clinical trajectory
